### Assessment Methodology

A 1000 – 1500 word assignment.

### Grading of this unit

The following grade descriptors will be applied to the assessment of this unit:

1 Understanding of the subject  
2 Application of knowledge  
4 Use of Information  
5 Communication and Presentation  
7 Quality

Please refer to the QAA Grade Descriptors for detail of the components of each descriptor.
**Indicative Content**

**Learning Outcome 1**

Learners should outline a typical management framework within a construction project with responsibility for issues relating to Health and Safety in a Construction environment.

Learners should explain the methods for communicating issues relating to Health and Safety, understanding the importance of communication and providing examples of effective communication.

**Learning Outcome 2**

Learners should describe the legislative framework within which parties must operate.

Learners should provide examples of breaches of the legislative framework and identify possible sanctions.

**Learning Outcome 3**

Learners should describe the process of data collection, explain issues for the accuracy of records and identify the importance of data in relation to accident reduction and monitoring.

Learners should describe the role of the individual in relation to the recording of accidents and identify reporting procedures and recording of accidents.

Learners should evaluate the requirements relating to data outlining the reasons for collection and how this information can be used in the continual improvement process within the industry in relation to health and safety.

**Validation end date: 31 August 2019**
