Unit Information

Unit: Human Reproductive Biology
Level: 3
Credit Value: 3

What you will study:
You will learn about the male and female reproductive systems and the role of hormonal control in the reproductive cycle. You will also learn about the surgical, mechanical and hormonal methods of contraception. You will cover genetic disorders and genetic screening, including the inheritance of sex-linked diseases and the use of pre-natal screening. It will include the methods of genetic counselling.

How you will be assessed:
1. You will complete a number of short answer questions.
2. You will write a short essay.
