Unit Information

Unit: Project Management
Level: 3
Credit Value: 6

What you will study:

You will learn about the discipline of project management and its role within the construction industry. You will review the project management sector and examine the phases of construction that fall within a project manager’s responsibility. You will learn about the types of resources used throughout the construction process and how these are allocated against construction activities.

You will learn to identify and explain some key documents that are used within the construction sector and some key methods used for planning projects. This will include funding of projects and methods of costing. You will learn about areas of risk within project management and the ‘time, cost, quality framework’.

How you will be assessed:

1. You will need to answer a number of short answer questions.
2. You will complete a 45-minute exam over Skype
