Unit Information

Unit: Research Methods in Psychology
Level: 3
Credit Value: 3

What you will study:

You will learn about the different methods used by psychologists to research behaviour, such as; types of experiments, observations, case studies and the types of data analysis. You will also learn about the ethical issues that can occur in research, and the ethical guidelines set up by the BPS in response to these. The unit will also cover the reliability and validity of research methods.

How you will be assessed:

1. You will complete a number of short answer questions.
2. You will write an essay.
