Unit Information

Unit: Fundamentals of Chemistry
Level: 3
Credit Value: 3

What you will study:

You will learn about atoms, the periodic table and the key parts of these. You will gain an understanding of chemical bonds and structures, which will cover intermolecular forces. It will also cover formulae for common ions and compounds, including writing balanced equations. You will also learn how to deduce the shape of a simple molecule. You will also learn how to do simple molar calculations.

How you will be assessed:

1. You will need to complete a number of short answer questions.
